EXPERIENCE

User Interface Designer Intern — Syracuse, NY
SUNY CPD — Aug 2019 - Present

- Conducted user research, design sketches and prototyped the SUNY CPD website based on the feedback which helped improve performance and number of visits by 45%.
- Complying the WCAG 2.0 accessibility guidelines and considering the user feedback after usability testing.
- Worked in collaboration with event manager and other team members to design brochures, flyers, posters for different conferences by considering brand guidelines.

UX Designer Intern — Mumbai, IN
OTO Capital — May 2019 - Aug 2019

- Designed the responsive interface for their mobile application and web console using Adobe XD.
- Created and conducted an A/B test to evaluate a new interface using UX metrics. New designs increased the user experience by 15%.
- Analysed and synthesized research findings into new design ideas, created wireframes, and high-fidelity prototypes using Adobe XD.
- Collaborated with product managers, developers, and CTO to enhance the product features and meet business goals.

Graduate Research Assistant — Oswego, NY
SUNY Oswego — Aug 2018 - May 2019

- Reviewed the research studies, worked on hypothesis and re-run the experiment with the new bunch of the participants to verify the results of the studies.
- Recorded, classified and administered different research data, researched relevant publications and data to assist professor in building experiment methods.
- Instructed 100+ participants from diverse backgrounds by clarifying experiment procedures independently.

Application Developer — Mumbai, IN
Seclore Pvt Ltd. — Oct 2015 - July 2018

- Improved product UI by reducing the dropoffs and enabling faster access to IRM protected documents for authorized users by streamlining new user onboarding, authentication, file access request and approval flows.
- Designed user journeys, wireframes, and interfaces for new features for the mobile application.
- Implemented single sign-on, user account management, build a web application, designed it's UI and developed the site as a full stack web developer to make interaction easier.
- Developed responsive products using HTML, CSS & JavaScript.

ACADEMIC ACCOMPLISHMENTS

Fella Application — Oswego, NY
UI Designer and Prototype Developer — Sep 18 - Dec 18

- Designed user flows & paper prototypes based on user interviews and competitive analysis.
- Followed the agile approach for product design, created visual designs based on the feedback from the results of usability testing.

Safer — Oswego, NY
Interaction Designer and UI Designer — Oct 18 - Feb 19

- Designed the wireframes and visual design for the smartwatch, web and mobile application for healthcare / medical industry.
